

# Telescopic Fork Mounted Jib (FMX)

Our Fork Mounted Extending Jib offers the flexibility to handle varying loads at different load centres. The manually extendable inner beam can be moved to suit your desired load centre and offer a solution to previously inaccessible loads. To fit, simply drive slowly forwards into the attachment, until the truck forks are fully sleeved, then simply fit the heel pins provided behind the forks to retain the attachment. Ensure the attachment is fully secured before lifting commences.

CONTACT Fork Mounted Extending Jibs allow transportation of long loads. The two hooks provided allow loads to be slung at greater centres than with conventional fixed jibs. The greater length available allows loads to be picked up from otherwise inaccessible areas. Supplied with two swivel hooks. This jib is *Manual Extension*.

Model Ref	Weight	C of G Min	C of G Max	Fork Spread
FMX 500-1.3	117kgs	835mm	1032mm	496mm
